Memorandum

Date: April 16, 1996

To: George Barnes, Chief
Modeling Support Branch

From: Steve Yaeger, Program Deputy Director
CALFED Bay-Delta Program

S

Subject: Modeling Request

The CALFED Bay-Delta Program respectfully requests that the following six runs be conducted to assist in the analyses of the ten draft alternatives.

As you are aware, CALFED and DWR staffs and CALFED consultants are applying spreadsheet models to make estimates of water supply and water quality benefits of the 10 draft alternatives. These spreadsheet models are primarily based on the results from existing DWRSIM runs.

In order to analyze the effects of large scale demand reductions on project operations and Delta water quality, the following three variations of the existing DWRSIM run with the May 95 SWRCB Water Quality Control Plan requirements (study 414.bf) are needed.

My understanding is that these runs could be conducted in a short time with minimal effort. Please conduct these three runs and transmit the results to Marco Bell. If you have any questions, please contact me at 657-2666, or have your staff contact Marco at the same number.

<u>Run No.</u>	<u>SWP Demand Level (MAF/Yr.)</u>
1	2.6
2	3.2
3	3.7
